## Poly “Ultra Thin” Liner

### Product Information

Construction - BOPP Polypropelene or PET Polyester

Usage - Sacrificial liner/underlay

Thickness - 25 micron

Heat Resistant - Yes

Shrinkage - NIL

Cores - All on 76mm cores

**Advantages:** If by chance the liner does happen to crease, the crease will not transfer to the surface of the image as it can with paper. Almost 1/2 the price of standard underlay paper. Less bulk waste disposal. Polypropelene will not have the static issues experienced with polyester.
